JOB POLARIZATION: MEASURING THE DANGERS OF AUTOMATION

Raquel Sebastián Lago
Young Talented Researcher,
Universidad Complutense de Madrid

Thursday 9th October 2019, 12:00-13:30pm.

KEY WORDS: Technological change, job market polarization and its effects on inequality and unemployment.

HIGHLIGHTS: This article proposes a non-parametric index of job polarization that help disentangle labor processes (job upgrading or downgrading, job polarization and concentration) and test the Routine Biased Technological Change hypothesis.
